

# BXSAFETY

## 2019 Awards

### Safety Innovation Award > For creative and unique safety practices or tools.

#### > Limbach Company, LLC

With jobsite safety in mind, the Mechanical Grooves System Cart was created with all the required tools to groove pipe carried on one mobile unit. It prevents clutter and eliminates the risk of strains and pinch points while carrying the equipment separately.

#### > Miles-McClellan Construction Co., Inc.

The Masonry Access Bridge was developed to allow for a safer transition from a mobile scaffold work platform to a solid landing by eliminating the fall hazard associated with climbing the scaffolding between levels.

#### > The Superior Group

A Splicing Connex was developed to improve overall safety during electrical vault confined space operations. It keeps the electrical equipment dry during terminating and splicing operations as well as allowing for safe operations in all weather conditions.

### Safety Achievement Award > For outstanding injury and illness statistics.

- > Anderson Concrete Corp.
- > Bruner Corporation
- > Buckner & Sons Masonry, Inc.
